* The filer requested confidential treatment of its Submarine Cable Operator Report data. The regional totals include both public and confidential data.

** On July 16, 2020, the American Samoa-Hawaii segment of the American Samoa Hawaii Cable System was retired and taken out of commercial service. The Samoa-American Samoa segment remains in service and is now known as the Samoa American Samoa Cable.

*** TAT-14, Columbus III, and the Pan American Cable System were retired from service on December 15, 2020, December 18, 2020, and December 5, 2021, respectively. The Antillas-1 cable landing station located in Isla Verde, Puerto Rico, ceased originating or terminating any traffic on the Antillas-1 submarine cable system on September 12, 2022. With the exception of Segment 1 of the Japan-U.S. Cable Network ("S-I link," from Makaha, Hawaii to Morro Bay, California), the remaining cable was retired from service as of October 30, 2023.

**** The Challenger Bermuda (CB-1) cable system was retired from service on May 18, 2024.

We note that: (1) data as of 2007 to 2013 were extracted from the 2013 Section 43.82 Circuit Status Data Report; (2) the "number of cables in service" reflects the number of U.S.-international cables for which an in-service notification was filed pursuant to 47 CFR § 1.767(g)(15) as of the end of the reporting period; (3) on December 28, 2018, the International Bureau released a revised Filing Manual and clarified the definition of "[a]vailable capacity, also known as design capacity, is all of the capacity (both lit and unlit capacity) on the cable as of the reporting date (December 31 of the reporting period)." International Bureau Releases Revised Filing Manual for Section 43.82 Circuit Capacity Reports, Public Notice, 33 FCC Rcd 12517 (2018); Filing Manual at 6, para. 28.
